

Shipments are no longer generated from the mailroom alone. Managing shipping expenses can be daunting especially when employees are working from many different offices and remote locations. Unchecked shipments cost money and controlling costs is challenging.

SCALABLE CLOUD TECHNOLOGY

POWERFUL COST CONTROL

FLEXIBLE DESIGN

SMART SHIPPING CHOICES ARE JUST A CLICK AWAY

Neopost's Enterprise Shipping System (ESS) is a one-of-a-kind cloud-based shipping application that enables users to make smart shipping choices. The functionality allows users to choose a carrier at the best price and create shipments straight from their desktop—no matter where the user is located.

Important factors such as delivery service options, service fees and rates are often not considered when packages are shipped. Without the right tools to determine the most cost effective method, employees are not aware that they have choices. Neopost's ESS solution helps employees avoid unnecessary spending which can cost businesses 30% to 40% more per package—thousands or even millions of dollars over time.

BUSINESS PROCESSES YOU CAN RELY ON

Running a smooth business takes the right people, the right processes and the right systems no matter what you are managing. Having the right business rules in place can only make your job easier. One discipline many businesses find challenging is allocating shipping costs to the appropriate cost center, project or department. Neopost's ESS application
